We cordially invite you and your coworker to attend and participate actively at TSIS 2007, the world largest interdisciplinary science conference for the presentation and discussion of the most recent advances in medical science.

Within the **interdisciplinary summit on inflammation** during TSIS 2007, all major disease entities, in which inflammatory processes play a central role, shall be discussed. Symposia will be organized on the following subjects:

Mechanical and burn trauma, shock and reperfusion, transplantation, infection and sepsis – representing acute inflammation.

Also most importantly, our current understanding of the **initiators, drivers and resolvers of sub-clinical chronic inflammatory diseases – metabolic syndrome, diabetes, atherosclerosis, autoimmunity (vasculitis, rheumatoid arthritis, chronic inflammatory bowel disease), neuropathies, and Alzheimer's disease** shall be comparatively analyzed. Particularly, the panels will discuss the validity of the **danger signal theory** and associated **molecular patterns of endokines and alarmins** representing the potential common denominator of the initiating processes of inflammation.

TSIS 2007 also provides the ideal venue to learn about the promise and limitations of **genetics, genomics** and **proteomics** in inflammation research as well to get introduced to new frontiers of the detection of acute and chronic organ dysfunction via **molecular imaging**.

Congress format

Around **100 program segments with topics**, equally distributed between basic cell biology and pathophysiology and a wide array of more clinically oriented subjects have been chosen by the scientific committee to be covered in **plenary lectures, mini symposia, free communication sessions, poster discussions** as well as „hands on“-workshops.

Submission of abstracts

We welcome the **submission of abstracts** with **innovative research work** to the program as oral- or poster presentations. We particularly encourage young researchers to present their recent scientific work. There will be the **young investigator award competition** – the **Arthur E. Baue Award** will then be given to the best of the peer reviewed work submitted to TSIS 2007. Tentative topics for abstract submission to be seen from www.TSIS2007.org.

Abstract submission

The abstracts must be **original work**, not previously published or in submission to other meetings.

The structured abstracts must be submitted **only by using the online abstract form** from the congress website under www.TSIS2007.org.

All abstracts accepted for presentation will be published in SHOCK.

Deadline for receipt of abstracts is Sunday, November 5th, 2006.

The authors will be informed of the **program committee's decision** by **December 30th, 2006**.

Industrial exhibition

A large exhibition with pharmaceutical and medical engineering industries will be held in the foyers of the auditorium section of the Clinical Center Grosshadern, Marchioninistrasse 15, D-81377 Munich, Germany. For information and registration please contact **EUROKONGRESS**, Isartorplatz 3, D-80331 Munich, Germany, Email TSIS2007@eurokongress.de

Organizing Secretariat

For registration, hotel accommodation and travel arrangements please contact **EUROKONGRESS**.

We look forward to welcome you in Munich by TSIS 2007.

Yours sincerely
Prof. Dr. Eugen Faist
